

## CHRISTIAN BROTHERS COLLEGE HIGH SCHOOL MATHEMATICS DEPARTMENT

---

The following is the CBC Mathematics Department's expectations regarding calculators.

### **A TI-84 Graphing calculator is REQUIRED for all mathematics students at Christian Brothers College High School.**

This calculator will be used all four years at Christian Brothers College High School. It is allowed on most assessments in CBC's mathematics courses and on the ACT, SAT, and AP Exams. These calculators cost \$100 - \$150 new. The best deals are during the back-to-school sales in July and August, but you can often find good used models on eBay or similar sites for \$50-75. It is the student's responsibility to bring his calculator to every mathematics class, so that he can participate in the daily activities.

#### **TI 84 – Plus CE (most popular)**

#### **TI 84 – Plus (Regular or silver)**

\*Do NOT purchase a **TI-89** or any calculator with **CAS** in the name as these are not permitted on the ACT, AP Exams, or Mathematics assessments at CBC.

\*It is recommended that you do NOT purchase a **TI-Nspire** as the built-in features and functionality are different from the TI-84.

\*Calculator apps on laptops or phones will NOT be allowed at school.
